Linkedin–Github-Portfolio

Full Stack Developer with over 1 year of experience, passionate about creating high-performance web applications and innovative technological solutions. Throughout my career, I have achieved a track record of successes, including:

- Created an online product catalog platform that increased sales conversions.
- Interacted with blockchain and wallets to enhance transaction security.
- Strong skills in JavaScript, React, Redux, and related technologies.

My commitment to programming excellence and effective resolution of technical challenges drives me to continue innovating and providing cutting-edge solutions in the world of web development.

PROYECTS

Full Stack Web Developer – Mayako Argentina Visit Aug-2023

- Developed an online product catalog platform that offers users an interactive and efficient experience. It provides a detailed product visualization, along with the ability to make inquiries via email for purchases and other concerns.

- Utilized key technologies such as JavaScript, React, Redux, HTML, and SCSS on the frontend to ensure an engaging and seamless user experience.

- Used Express with MongoDB to efficiently manage data, providing a solid foundation for comprehensive product visualization and management, as well as overall site administration.

Full Stack Web Developer – Libertum Project Visit Jan 2023 - May 2023

- Developed multiple components on the frontend, contributing to the creation of a dynamic user interface.

- Established web3 connections with wallets and the backend, ensuring seamless interaction with the blockchain.

- Utilized technologies such as JavaScript, React, Redux, web3, HTML, CSS, Node.js, Express, and MongoDB in the comprehensive development of the project.

Full Stack Web Developer – HP Grupos Electrógenos Visit Dec-2022

- Utilized a combination of technologies such as JavaScript, React, and Redux Toolkit on the frontend to create a dynamic and engaging user experience.

- Used Express and MongoDB to efficiently manage data, enabling easy updates of information and the incorporation of new products.

PROFESSIONAL EXPERIENCE

Full Stack developer Libertum Project / Lunar Labs.:   Jan 2023 – May 2023

- Utilized a broad range of technologies, from HTML and CSS for visual design to Javascript, Typescript, React, and Redux for interface creation, and Web3 for blockchain connection.

- Used MongoDB as a database, leveraging its NoSQL potential for efficient data storage and retrieval.

- Adopted the Agile Scrum methodology for efficient project management, facilitating collaboration and maintaining a focus on regular and high-quality deliveries.

(Free Lance) Staff leader on videogame servers   2013 – 2021

- Coordinate and led an administrative team dedicated to enhancing the user experience on gaming servers, ensuring a smooth and engaging gaming environment for over 300 simultaneous users.

- Designed and implemented strategies to optimize user interaction with the servers, focusing on satisfaction and retention.

- Supervised and managed in-game event organization, promoting participation and community engagement among users.

(Free Lance) Videogame server developer   2013 – 2021

- Utilized my programming skills in C++ and Lua (among others) to create gaming servers, establishing the technical foundations for immersive gaming experiences.

- Designed and developed interaction systems and game mechanics using technologies such as C++ and Lua, adding depth and fun to player experiences.

- Integrated the MariaDB database to efficiently manage game data persistence, ensuring the integrity and accessibility of key information.

TECHNOLOGIES:

Programming Languages: JavaScript, Java, Node.js, HTML, CSS, C++, Lua.

Frameworks: React, Redux.

Databases: MariaDB, MongoDB, MySQL, Postgres.

Web Technologies: Express.js, Sequelize.

Tools: Git, Slack, Trello.   **Agile** Methodology: Scrum.

PROFESSIONAL EDUCATION

- Full Stack Web Developer. Henry Bootcamp. 800 hours of theoretical-practical coursework. 2022.
- Sound Recording and Post-Production 2018-2021 at TECSON.
- Systems Engineering (Intensive Online Program) 2022-2025 at UTEL-Mexico.

LANGUAGES

- English C2 – Proficient
- French – Basic
- Spanish - Native
