Agustin Panizza

Full stack developer with a passion for programming. I started 10 years ago creating game servers with C++ and Lua. Experience working in NodeJS, React, Redux, SQL among other industry technologies. I currently work on a blockchain startup as a fullstack developer. With creative thinking, innovation, communication, proactivity and logical thinking.

TECHNOLOGIES

HTML, CSS, SCSS, Javascript, React, Redux, Node.js, Express, Postgres, Sequelize, Scrum, MongoDb, MariaDb, jest, Web3.JS

WORK EXPERIENCES

Free lance – Staff Leader / Organization of the management team to achieve the best possible experience for users on video game servers with more than 300 simultaneous users **2013–2021.**

Free lance – Development of video game servers using C++, Lua , MariaDb. **2013–2021.**

Libertum Project / Lunarlabs – As a Full Stack Developer, I have utilized technologies such as HTML, CSS, Javascript, Typescript, React, Redux, Node.js, Express, Postgres, Sequelize, Web3, Jest, Scrum, MongoDB, and MariaDB to develop web applications from scratch, including both the backend and frontend. I have implemented agile methodologies such as Scrum, ensuring that the code is well-documented and tested to ensure quality. **Jan 2023 – May 2023**

PROYECTS

Full Stack Web Developer – Portfolio Visit
- Desing and develop the app using React, Redux, javascript , HTML and CSS.

Front End Web Developer – CodeLearn Visit jun. 22 – jun 22
Henry Bootcamp, Buenos Aires, Argentina.
